Degree Offered: Master of Arts Degree in Educational Psychology and Counseling
Mission/Purpose: The Master of Educational Psychology and Counseling Program's mission is to provide a broad base knowledge of the fields through a shared core and specific concentration in either Educational Psychology or Counseling with a strong research, critical-

culture, and the role of ethics and diversity training in psychology. The program design equips graduates with a strong foundation to pursue a doctoral degree in Psychology or related fields of study. The program graduates work in a wide range of industries, including academic; research; healthcare organizations; community; and businesses.

Program Overview: The Master's [Degree Program](#) in [Educational Psychology and Counseling](#) is a 45-credit hybrid program that will prepare students to develop foundational knowledge in psychological education, theory and research. Local, national, and international students may select this M.A. degree as an opportunity to obtain prerequisite courses to meet eligibility requirements for [application](#) to other psychology programs, including advanced doctoral studies in Applied Behavior Analysis. The programs specialty tracks will also allow a variety of professionals within the fields of education, human services, counseling, and allied health to access coursework both as degree seeking and non-degree seeking students in order to advance their psychological knowledge and use of psychological applications in their respective fields. A unique quality of the curriculum design is its attention to the development of basic interpersonal skills, cultural sensitivity, and additional knowledge and skills that enhance the preparation of students for professional work in increasingly diverse social agencies, school and community settings, in business and industry environments, and in hospitals.

Admission Requirements: To be considered for the Master of Science degree program in Educational Psychology and Counseling, applicants must have completed the B.S degree from a department at an accredited institution in any of the following areas:

- o Biology
- o Chemistry
- o Psychology
- o Sociology
- o Social Work
- o Political Science
